

I find utilizing satellite radio for instant traffic and weather info to be of greater convenience and to be more usable generally than from other sources, including broadcast radio and tv. It is contrary to my rights as a taxpayer for the NAB to be speaking for me and I urge you to reject their attempt to limit and regulate what I am permitted to hear over this countries airwaves. They have no legitimate authority to regulate satellite radio in particular. Reject the NAB petition 04-160
